**Re: In the Matter of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Please allow small ISPs to compete in the marketplace and don't block them from using infrastructure that only one company can access. Physical wiring and infrastructure belongs in the public domain because it traverses public roads and pathways. Small companies can not easily create this infrastructure, however they can provide unique services, such as trusted and private connections, that large companies won't care about if customers have no other option. Please keep competition in the marketplace!

Thanks,

Noah
